Complete garbage, I bought it because it looked ok and was only a few bucks. Unfortunately it was not worth the few bucks considering the only decent thing about it is the music, and I do not buy games to sit back and listen to music. Grabbed it during black friday sale and that is a very busy time of year; and planned on playing during winter break only to find out that is past the return window even though I have about 30 minutes of gameplay time and policy allows for up to 2 hours. Fewer purchases going into the future with Steam.
